

Find out how your business can save or make money by utilising its waste.

BIOMASS FOR BIOENERGY OPPORTUNITY

The Biomass and Bioenergy Forum will be an opportunity for industry, business and thought leaders to access the latest thinking, information regarding government support and on the opportunities available with Biomass and Bioenergy.

Learn more about how our regional waste products can be utilised as a potential energy or heat source or alternatively be a viable value-add for businesses.

FORUM
ENERGY

FIND OUT MORE ABOUT

- Support available for local businesses to create value-add products from waste
- Bioenergy technologies – alternatives for electricity and heat production
- The business case for bioenergy
- Available and commercial technologies for turning biomass feedstock into heat and electricity
- Regional Case Study examples on how businesses are utilising slow pyrolysis, combustion or anaerobic digestion to achieve results.
- Key findings from the SARDI Food Loss and Industry Waste project
- Financing and feasibility funding opportunities
- Hear and connect with industry experts from:
 - Department Premier and Cabinet
 - Primary Industries and Regions SA
 - Green Industries SA
